## About the Splunk Dashboard Studio tutorial

In this tutorial, you are a representative of Buttercup Games, a fictitious online store that sells games and related items. You want to present an update on revenue and purchasing trends. Follow along with the Splunk Dashboard Studio tutorial to create a dashboard that tells your story.

With Splunk Dashboard Studio, you can report on important metrics and historical trends by building creative, customizable dashboards. You can complete this Dashboard Studio tutorial in either Splunk Cloud Platform or Splunk Enterprise. You will create a dashboard for Buttercup Games by completing the following tasks.

- Add and configure data sources
- Add and format different visualizations
- Add inputs to create interactive dashboards
- Export and share your dashboard

Each part of the Splunk Dashboard Studio tutorial builds on the previous steps. Follow along with this tutorial sequentially to ensure that your dashboard is fully functional.

- Part 1: Configure data sources for the Splunk Dashboard Studio tutorial
- Part 2: Create a dashboard
- Part 3: Add a table with column formatting
- Part 4: Add a line chart
- Part 5: Add a single value visualization
- Part 6: Add a map
- Part 7: Add a input
- Part 8: Save and export the dashboard
